Sitemaster 200® Instructions for Updating to a new version

Sitemaster 200® Version required: 4.0 or greater

When to use this guide:

- You having an existing copy of Sitemaster 200® and would like to update to the latest version;
- You have just installed Sitemaster 200® and would like to update to the latest version;
- You are adding a new workstation and need to update the installed version of Sitemaster 200® to the latest version.

To complete this install, you will need Administrator permissions on the computer you are installing Sitemaster 200®.

Step by Step Instructions: (continued)

6. Respond to the Administrator permission screen by checking the box “Do this for all current items” and then pushing the Continue button.

7. The files should appear in the Sitemaster 200® v4.0 folder. This is all that’s required for updating to the latest version. You can run Sitemaster 200® normally using the Desktop icon and it will detect the latest version and run it automatically. You should not click directly on any of the Sitemaster icons in this folder.
